Southern College of Optometry

The Eye Center

SCO’s 57,000 square foot clinic, located in the heart of Memphis’s prestigious Midtown Medical District, is the Mid-South’s most comprehensive provider of eye health and vision care. In addition to The Eye Center, SCO students and interns visit local schools, regional rehabilitation centers and nursing / assisted-living facilities to provide care, creating approximately 150,000 annual patient encounters.

In addition to having one of the lowest non-regional tuitions of all optometry schools, over 200 endowed scholarships are awarded each year to deserving students by SCO. Approximately 50 academic scholarships, ranging from $1,000 to $10,000 per year will be awarded to the 2014 entering class.

SCO students and alumni are offered on-campus seminars and workshops on how to operate a successful private practice through the Hayes Center for Practice Excellence, as well as, comprehensive career counseling to better prepare students for entry level practice.
